DISPOSABLE PVC BAILER

ecobailer

Clear PVC EcoBailers — Great Value & Features at an Affordable Price

Made of clear, virgin PVC with a density of 1.31, Clear PVC EcoBailers sink rapidly as weighted bailers without requiring additional weighting material. Since they are clear, they allow visual inspection of well samples.

Features:

- sink rapidly in water without requiring additional weights
- clear material allows visual inspection of samples
- longer bottom spout helps prevent silt from interfering with check ball and causing potential leakage
- more rigid and less likely to bend than competing Polyethylene bailers
- the only bailer with optional reusable weight system to increase sink rate
- custom emptying device for regulating discharge flow, included with every bailer
- require less material to produce, resulting in less waste when disposed of
- shipped in brown recycled cardboard boxes, unlike many competing bailer products

Reusable Weight System

For a super fast sink rate, you can use our **Superweight PVC EcoBailers** or use a 7/8" stainless steel nut. The EcoBailer's bottom spout has been designed to allow a

7/8" nut to be easily screwed onto it and reused when needed. No other bailer offers this innovative reusable weight system.

SIZE	DIAMETER	LENGTH	VOLUME	QUANTITY
3"	3.3"	3'	5 L	8 bailers/case
1.5"	1.5"	3'	1 L	24 bailers/case
0.7"	0.7"	3'	230 ML	24 bailers/case
0.5"	0.46"	3'	85 ML	24 bailers/case

BOTTOM EMPTYING
